Passionate developer turning problems into clean, scalable solutions

Education

KIT - Kalaigarkarunanidhi Institute of Technology,
B.E – CSE(Artificial Intelligence and Machine Learning)

2023 – 2027
CGPA: 8.12

Course Work: Operating Systems, Database Management System, Computer Networks, Data Science.

Technical Skills

Programming Languages: Python, C, Java, OOPS.

Version Control: Git, GitHub

Web Development: HTML, CSS, JavaScript, React.js, Next.js, Spring Boot.

Databases: MySQL, MongoDB.

Cloud & ML models: Firebase Storage, YOLO Models, NLP.

Projects

Blockchain-based Lost & Found Platform 📄 | *React.js, Next.js, PostgreSQL, TailwindCSS*

Aug 2025 – Sep 2025

- Built Python + Flask + Ethereum solution with IPFS for decentralized asset tracking.
- Implemented CNN-based image recognition to improve lost-item matching accuracy.

Smart Helmet for Safety Detection (IoT + ML) 📄 | *Yolo v8n, IOT-Sensors*

Jun 2025 – Jul 2025

- Designed IoT system ensuring vehicle ignition only with helmet detection.
- Integrated ML models for accident prevention and real-time safety monitoring.

Achievements and Awards

- Participated in VIT Hackathon – “HackHub”.
- Secured a position among the top 10 in 24-hour and 12-hour hackathons.
- Participated in Karpagam Hackathon – “HackSparo”
- Solved over 1450+ problems across various coding platforms including CodeChef, LeetCode, and Codeforces.
- Participated in 70+ contests across various competitive programming platforms.
- Participated in the ICCSS 2025 conference held at Rathinam College of Engineering and presented the research paper titled “WorkforceTransformer Universal : An AI-Powered Cross-Industry Workforce Transformation Platform”.

Internship

Full Stack Developer Intern • Learnlogicify Technology

Jun 2025 - Jul 2025

- Built Flask-based REST APIs and microservices integrated with React for scalable applications
- Developed secure authentication and CRUD operations with optimized database handling, Managed and optimized relational (MySQL) and NoSQL (MongoDB) databases

AI Intern • Codebind Technologies

May 2024 - Jun 2024

- Designed and integrated AI-powered services into Flask-based web platforms
- Implemented NLP models for classification and automated responses Deployed Flask APIs for real-time ML model inference.

Certificates

NPTEL: Design Thinking – A Primer | **CISCO:** Introduction to Cyber Security

NPTEL: Foundation of Cloud IoT Edge ML | **COURSERA:** Introduction to Blockchain Technologies

SCALAR: Operating System, Machine Learning | **JUNIPER:** Mist AI, Associate (JNCIA MistAI)

Competitive Programming

- **LeetCode:** Max Rating **1636** | **Top 24.57%** globally | **448+** problems solved | **6 Badges**
- **CodeChef:** Max Rating **1548** (2★) | **599** problems solved | Highest Rating: **1560** | Global Rank: **5560**.
